PLAYER SUPPORT :

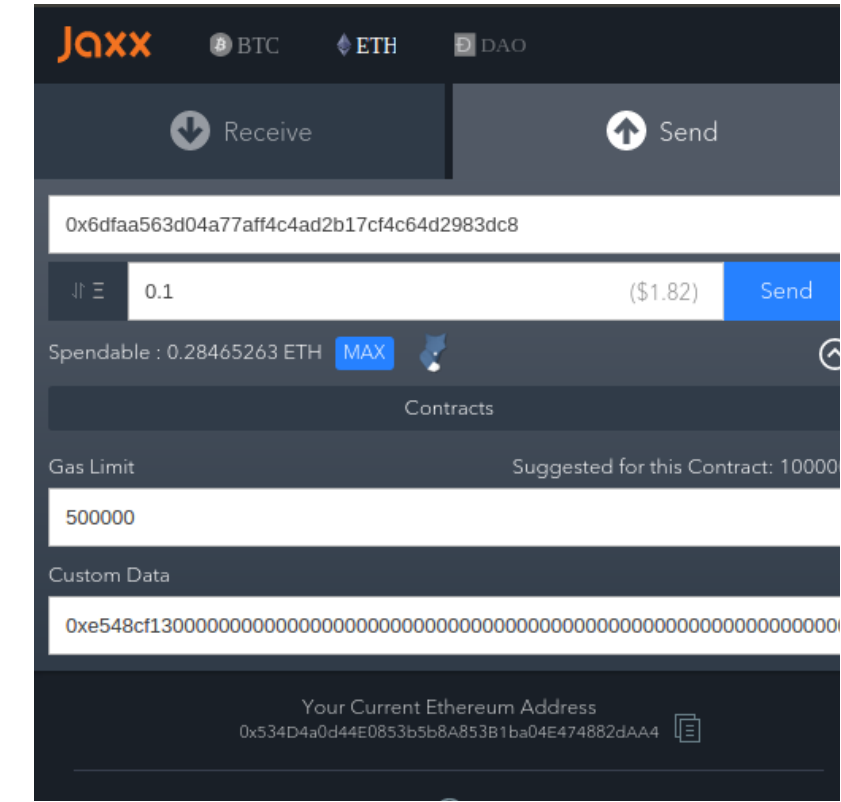

Create a transaction

1

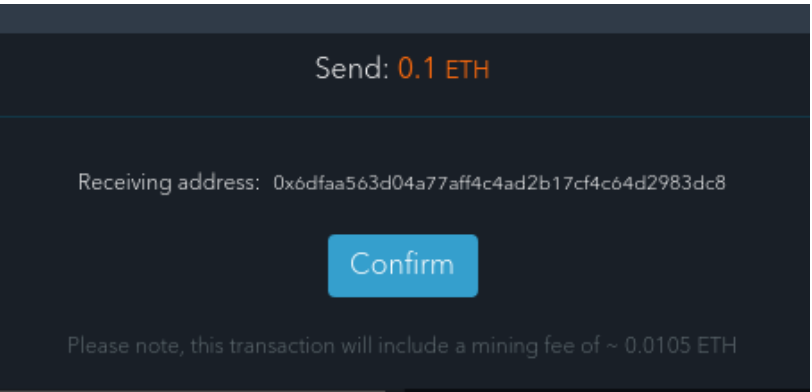

.Enter the address of the roulette, check the website for the latest version of the contract.

.Input the amount you want to bet, check the max bet on website .  
Any excess will be refunded immediately

.Chose your bet on the website's board and the transaction information box will update with the transaction data for your bet. Copy-paste the whole data into to the appropriate box in your wallet.

.Add enough gas to the transaction: 300 000 gas

Note that playing the game costs 0,003 ether, due ethereum's transaction fees. So take this into account.

.Check your bet on website, enter your address contract in this box.

.Note that everytime you have to wait a little bit for the ethereum blockchain to update before the website can show your progress.

4 After a few seconds, the croupier bot of Roulette will spin the wheel and the result will appear automatically on the website.

Good luck :) !

If you win, you will receive your payout immediately. In case of loss, you will receive 1 wei for confirmation.
